

热固性塑料挤出机 Thermo-set Plastic Extrusion Line

同转双螺杆挤出机具有良好的混合性能、自洁特性和精确的温度控制，使挤出机内物料充分混合，基本无压力排出。本生产线适用于生产聚酯、环氧、丙烯酸类粉末涂料、酚醛树脂、环氧密封胶等。

- (1) 高产量和最优混炼效果
- (2) 机筒具有高效热交换及独特的温度自动控制系统。
- (3) 机筒为对开设计，清机方便
- (4) 进料系统备有计量螺杆，进料量准确均匀
- (5) 具有优良的自洁能力

The excellent mixing capability, self wiping characteristics, and accurate temperature control of co-rotating twin screw extruder enable thorough mixing of materials inside the extruder and essentially no-pressure discharging. This line is applicable to the production of polyester, epoxy, and acrylic based power coatings, phenolics, and epoxy sealing compounds.

- (1) Big output, best mixing function
- (2) Barrels with efficient heat exchange and special temperature controlling system
- (3) Split barrel design enable you clean it quickly and easily
- (4) Feeding system with metering screw, ensure an accurate feeding
- (5) Convenient maintenance
